How to Convert AutoCAD Drawings into PDF files using DWG TruView 2011 by Autodesk
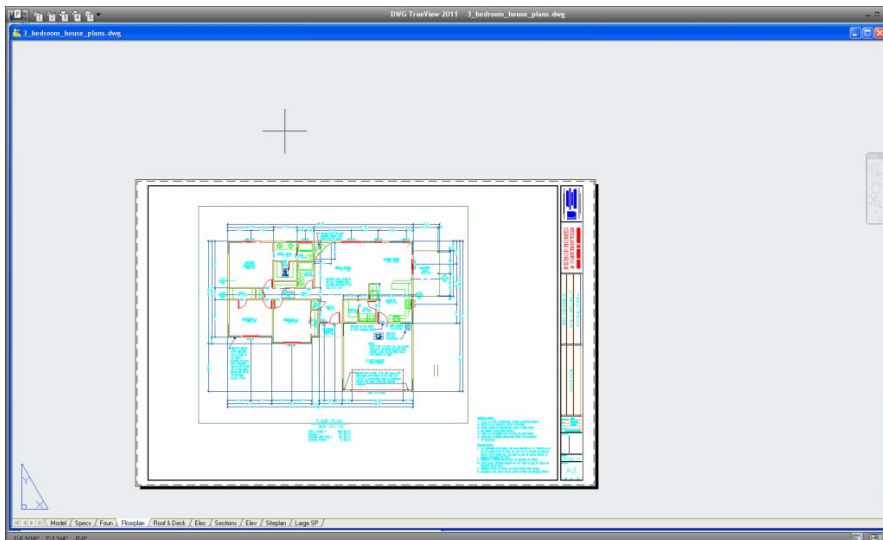

The program is free and can be downloaded from Autodesk .

Here is the link to website.

http://usa.autodesk.com/adsk/servlet/pc/index?siteID=123112&id=6703438

Here is a guide how to create a pdf file in TruView .

- Open the file , just double click

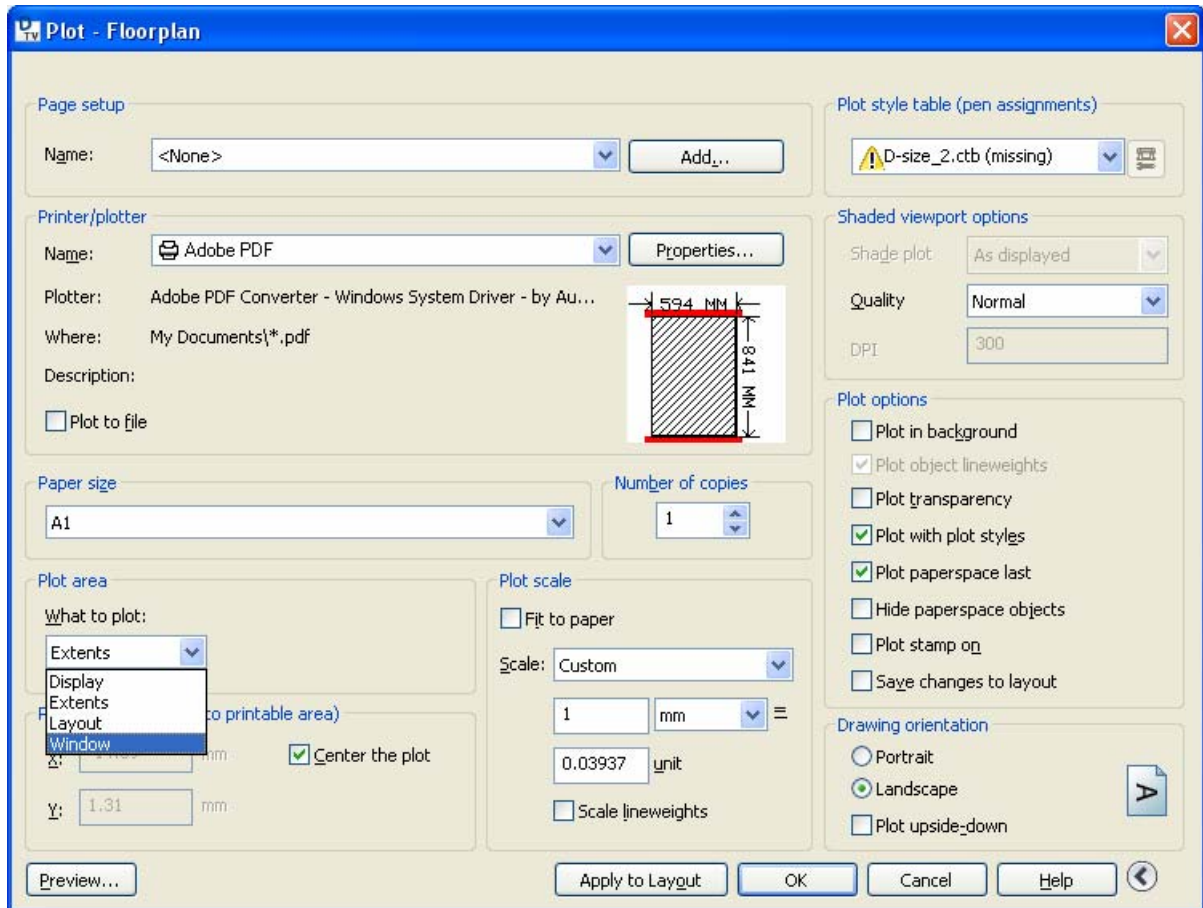

-

-Select Plot

Select driver either plotter or adobe (to create a pdf file)

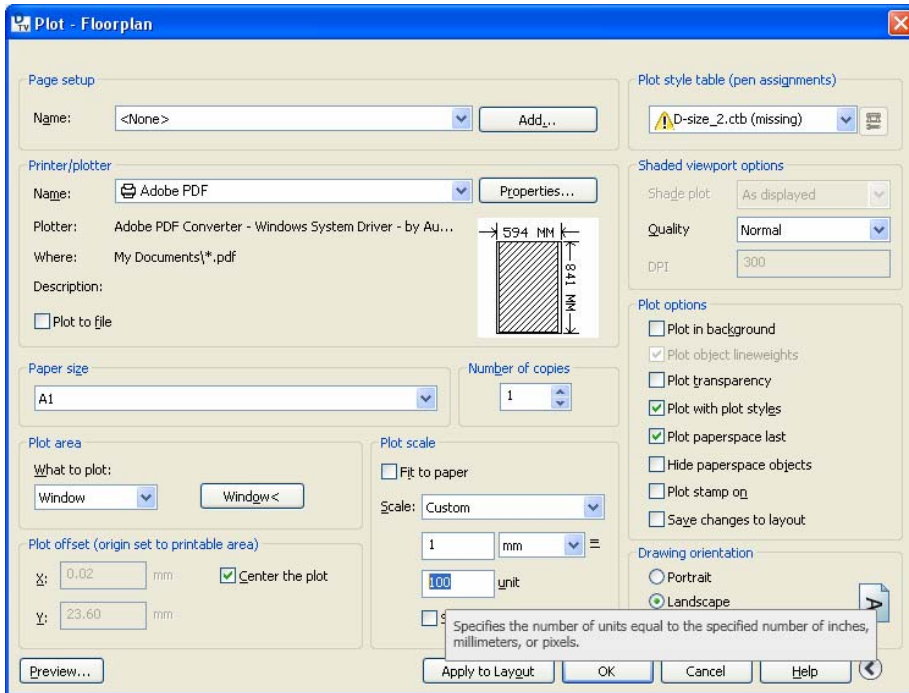

Select paper size desired
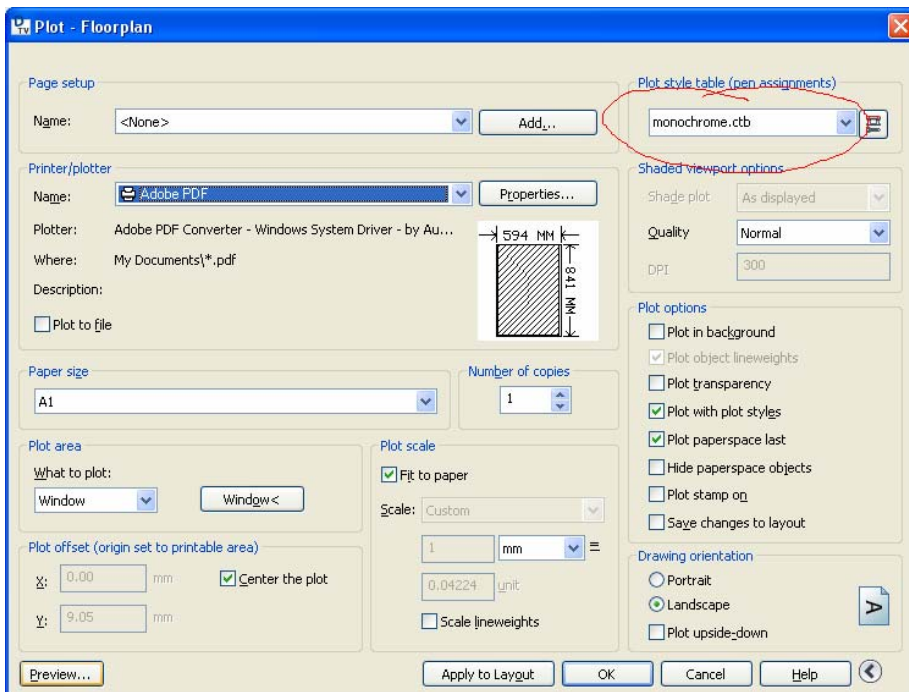

Select area to plot

By selecting window you must pick 2 diagonal points of the drawing

Select scale

Select pen assignments if none available choose monochrome or grayscale

Select print preview, to view what is going to be printed

-Press escape from preview window

-Click on ok if ready to plot

-the pdf should be in the same location as the drawing file.

If you have any queries regarding formatting your prints please call Repro-Online on 0800-737-764 or email sales@repro-online.co.nz
